PROFILE

Results-driven software developer with expertise in full-stack technologies including Node.js, Python, React.js, and PHP. Skilled at delivering high-quality, scalable solutions with attention to detail and a commitment to continuous improvement. Known for strong problem-solving abilities, adaptability, and effective communication. Passionate about leveraging technology to drive innovation and achieve excellence.

EXPERIENCE

Personal Projects

Frontend-Backend Projects

- **Real-Time Tracker**: Developed a real-time tracking application that provides live updates and data visualization, allowing users to monitor and analyze [specific data or activity] efficiently.
- **Weather App**: Created a weather application that integrates with weather data APIs to deliver current conditions and forecasts, featuring a user-friendly and responsive design for seamless access across devices.
- **Automated Social Media Posting Tool**: Designed a Python-based tool for automated social media posting, integrating with platforms such as Facebook and Instagram. Implemented features for handling duplicate posts, storing post links, and managing content.

Data Analysis Projects

- **Data Analysis of Sales Reports**: Conducted data analysis and visualization for sales reports using Power BI, showcasing the ability to derive actionable insights from data.
- **911 Dispatch Data Analysis**: Analyzed and visualized 911 dispatch data using Excel and Power BI as part of coursework, demonstrating proficiency in data handling and reporting.
